

Xtensible Solutions Named "Cool Vendor" by Leading Analyst Firm

Vendors Selected for the "Cool Vendor Report" Are Innovative, Impactful and Intriguing

Greenwood Village, CO – April 3, 2007 – Xtensible Solutions, Inc. today announced it has been included in the list of "Cool vendors" in the Energy and Utility, 2007 report by Gartner, Inc. (1) The report, published on March 13, highlights companies that are leveraging technology to improve the operational excellence of energy and utility companies by making them more efficient or more effective at delivering services and resources, including using Enterprise information management (EIM) tools and improved asset investment decision support tools are further enabling energy and utility agility.

Xtensible Solutions works with utilities worldwide to solve their enterprise information management challenges so that IT can be a business enabler rather than a cost center. By developing a strategy and deploying workable solutions to enable consistent usage of business semantics across application information, process integration, and business intelligence, utilities are gaining the real benefits and maximizing the returns of business programs such as Enterprise Asset Management (EAM), Mobile and Field Workforce Management (MFWM), Advance Metering Infrastructure (AMI), etc.

About Gartner's Cool Vendors Selection Process

Gartner's listing does not constitute an exhaustive list of vendors in any given technology area, but rather is designed to highlight interesting, new and innovative vendors, products and services. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness of a particular purpose.

Gartner defines a cool vendor as a company that offers technologies or solutions that are: Innovative, enable users to do things they couldn't do before; Impactful, have, or will have, business impact (not just technology for the sake of technology); Intriguing, have caught Gartner's interest or curiosity in approximately the past six months.

About Xtensible Solutions, Inc.

Xtensible provides strategic consulting and solutions to utilities faced with Enterprise Information Management (EIM) challenges that directly affect operating efficiency, knowledge management and collaboration across the enterprise. Xtensible is the leading provider of semantic-based information management solutions to the power industry worldwide. Our innovative Model-Driven Integration (MDI™) Framework solution provides methodology and tools to enable the successful application of mature industry standards and Information Technology (IT) architectural frameworks to solve specific business problems. MDI enables the full benefits of Service-Oriented Architecture (SOA) and EIM strategies by providing the semantic interoperability layer that is often missing in SOA and EIM solutions through the development and deployment of an Enterprise Semantic Model (ESM).
